
MICROSOFT FAMILY NIGHT AND INTERNET SAFETY NIGHT

Prairie Elementary School

Naperville, Illinois

School/Family/Community (S/F/C) members organized a Microsoft Family Night in September for families to see various educational and recreational software applications. In October, S/F/C members organized an Internet Safety Night presented by the Naperville Police Department (NPD) to help parents protect their children from dangers on the Internet. The NPD has been at the forefront of Internet child safety with the development of their internationally used Internet safety curriculum.

Microsoft Family Night exposed parents and children to exciting, practical computer applications to be used at home. The Internet Safety program provided parents with knowledge to ensure that their children could surf the Web safely by setting up appropriate, safe conditions at home. Both programs received positive comments.
